

2021 Plant Vacation Shutdown Notice

In accordance with provisions of Paragraph 202(b) of the UAW-GM National Agreement, be advised that **NO Weeks** have been identified as Plant Vacation Shutdown Weeks for **2021**. Note that this is based on the schedules of our assembly plant customers, which indicate that a substantial portion of these customers will be working during the weeks in July when we would normally declare as Vacation Shutdown Week.

As a result, employees making application for vacation time off will **NOT be required** to save any vacation entitlement hours for a Shutdown Week.

Just a reminder that employees who desire vacation time off during the calendar year should make application through their Group Leader during the application period which runs **through February 28, 2021**.
